PROFESSIONAL SUMMARY

Self-taught AI systems and automation builder with 8 years of enterprise IT and healthcare operations experience. Proven track record of building and deploying full-stack workflow automation using Python, React/Vite, Firebase, and Cloudflare Workers. Recently designed a PHI-safe enterprise AI pilot that advanced through enterprise governance review and received approval to begin pilot planning. The proposed mid-case efficiency model projected approximately 40,000 annual labor hours saved.

CORE SKILLS

- **AI Systems & Workflow Tooling:** Codex, ChatGPT, Claude, Gemini API, Prompt/RAG design, retrieval-backed assistants, agentic workflows, model integration orchestration.
- **Software Build & Deployment:** React, Vite, JavaScript, TypeScript, Firebase (Hosting, Functions, Auth), Cloudflare Workers, Wrangler, Git, GitHub.
- **Automation & Data Pipelines:** Python, CLI tools, JSON, APIs, webhooks, PDF parsing, SQLite, SQL, Power BI, DAX, Zapier, Airtable.
- **Enterprise Systems & Operations:** ServiceNow, Microsoft 365, Active Directory, Azure AD, Oracle E-Business Suite support, FACETS.
- **Reliability & Security Habits:** Trust-boundary review, server-side validation, secret scanning, deployment gates, source-vs-deployed parity checks, audit-ready documentation.

SELECTED APPLICATIONS

James AI Living Resume | jamesai.space

- **Engineered and deployed** a full-stack web application using a React/Vite frontend, Firebase Hosting, and cloud functions to allow recruiters to safely query verified resume data via source-grounded retrieval patterns.
- **Integrated** ElevenLabs voice synthesis for voice guidance while enforcing robust security habits, including secret-scan deployment gates and automated bundle integrity checks.

CogFit Jobs | cogfit-jobs.web.app

- **Built a secured job-fit web application with React, TypeScript, and Firebase** to programmatically evaluate job descriptions against custom cognitive fit parameters and operational work-style constraints.
- **Implemented** server-side Gemini LLM API connections, Firestore-backed rate-limiting

controls, and Firebase App Check to prevent unauthorized resource abuse and protect API usage and user data.

PDF Equipment Checker | pdf-checker-fcd6c.web.app

- **Developed and packaged** a deterministic Python data parsing application designed to automate the cross-referencing of complex engineering equipment schedules against blueprint plan drawings.
- **Replaced manual comparison pipelines** with structured multi-page CLI/JSON parsing diagnostics, error-handling heuristics, and a local Windows execution wrapper to avoid unsupported LLM extraction.

PROFESSIONAL EXPERIENCE

AI Consultant and Owner | *James Lane AI Consulting* | **Apr 2026 – Present** | Carlisle, PA

- **Customized** and deployed open-source projects, full-stack workflow MVPs, and automated portfolio assistants utilizing LLM APIs, cloud infrastructure, and JavaScript/Python frameworks.
- Used AI coding tools for repository inspection, scoped implementation, debugging, testing, build verification, and deployment secret scanning.

Claims Examiner I | *Capital Blue Cross* | **Nov 2025 – May 2026** | Remote

- **Designed and pitched a PHI-safe claims AI assistant pilot** that advanced through enterprise AI governance review and received approval to begin pilot planning; engineered source-grounding, compliance boundaries, and a 50/50 A/B evaluation matrix projecting 40,000 hours of annual labor savings.
- **Maintained 99% audit quality** while processing accuracy-sensitive claim workflows within FACETS, systematically creating markdown job aids to standardize high-variation claim scenarios for training queues.

Help Desk Analyst L1.5 / Enterprise Systems Support | *ICU Medical via Randstad* | **Jul 2018 – Aug 2025** | Mechanicsburg, PA

- **Programmed custom scripts, macros, and automated workflow aids** to eliminate highly repetitive identity verification tasks and streamline multi-step provisioning steps.
- **Administered Active Directory, Azure AD, Microsoft 365, and Oracle EBS** access management workflows for 3,000+ enterprise global users using ServiceNow ticketing systems.
- **Translated recurring incident patterns** into high-quality technical documentation and escalation templates, significantly reducing ticket rediscovery cycles and tier-2 routing leakage.

EDUCATION AND CERTIFICATION

- **High School Diploma** | Hephzibah High School
- **Certifications:** AI Fluency: Framework & Foundations (Anthropic) | Academy Accreditation: Generative AI Fundamentals (Databricks) | Business Analysis Foundations
